

Java Questions on Conditional Statements

If Statements

1. Write a Java program to check if a number is positive, negative, or zero using an if statement.
2. Create a Java program that checks if a given year is a leap year using an if statement.
3. Develop a program to determine if a person is eligible to vote based on age using an if statement.

If-Else Statements

4. Write a Java program to check if a number is even or odd using if-else statement.
5. Create a program to find the maximum between two numbers using if-else statement.
6. Develop a Java program to determine if a person qualifies for a discount based on age using if-else.

Else-If Statements

7. Write a Java program to categorize a grade (A, B, C, D, F) based on a score input using else-if.
8. Create a Java program to determine the type of triangle (equilateral, isosceles, scalene) based on side lengths using else-if.
9. Develop a program to categorize age groups (child, teen, adult, senior) based on age using else-if.

Nested If Statements

10. Write a Java program to check if a number is positive, and if positive, whether it's even or odd using nested if.
11. Create a program to check if a year is a leap year, and if so, verify if the year is also a century leap year using nested if.
12. Develop a Java program that checks if a student has passed a subject; if yes, check if the score is a distinction using nested if.

Switch Statements

13. Write a Java program to display the day of the week based on a number input (1 for Monday, 2 for Tuesday, etc.) using switch.
14. Create a program that displays the name of the month based on a number input (1 for January, 2 for February, etc.) using switch.
15. Develop a program that determines the type of season (Winter, Spring, Summer, Autumn) based on a month input using switch.
