

Data Analyst Placement Preparation Guide

100 Data Analyst Interview Questions

Python Interview Questions

- What are the key data types in Python?
- Explain the difference between list, tuple, set, and dictionary.
- How is memory management handled in Python?
- What are lambda functions? Give an example.
- Explain list comprehension with an example.
- What is the difference between 'is' and '==' in Python?
- How do you handle exceptions in Python?
- What is the use of the 'with' statement in Python?
- Explain the difference between deep copy and shallow copy.
- How do you read and write CSV files in Python using pandas?
- What are the key data types in Python?
- Explain the difference between list, tuple, set, and dictionary.
- How is memory management handled in Python?
- What are lambda functions? Give an example.
- Explain list comprehension with an example.

Data Analyst Placement Preparation Guide

- What is the difference between 'is' and '==' in Python?
- How do you handle exceptions in Python?
- What is the use of the 'with' statement in Python?
- Explain the difference between deep copy and shallow copy.
- How do you read and write CSV files in Python using pandas?

SQL Interview Questions

- What are the different types of JOINS in SQL?
- How do you find duplicate records in a table?
- What is the difference between RANK(), DENSE_RANK(), and ROW_NUMBER()?
- What is normalization? Explain 1NF, 2NF, 3NF.
- How do you write a query to find the nth highest salary?
- What is a correlated subquery?
- How do you use CASE statements in SQL?
- What is the difference between UNION and UNION ALL?
- What are indexes? How do they work?
- What are views and how are they useful?

Data Analyst Placement Preparation Guide

- What are the different types of JOINS in SQL?
- How do you find duplicate records in a table?
- What is the difference between RANK(), DENSE_RANK(), and ROW_NUMBER()?
- What is normalization? Explain 1NF, 2NF, 3NF.
- How do you write a query to find the nth highest salary?
- What is a correlated subquery?
- How do you use CASE statements in SQL?
- What is the difference between UNION and UNION ALL?
- What are indexes? How do they work?
- What are views and how are they useful?

Excel Interview Questions

- How do you create a pivot table in Excel?
- Explain the difference between absolute and relative references.
- How do you use conditional formatting?
- What are named ranges and how are they used?
- What is the difference between COUNT, COUNTA, and COUNTIF?

Data Analyst Placement Preparation Guide

- How do you handle large datasets in Excel efficiently?
- Explain the usage of INDEX-MATCH vs VLOOKUP.
- What is a dynamic chart and how do you create one?
- How do you use IFERROR and ISERROR?
- What is the use of the OFFSET function?
- How do you create a pivot table in Excel?
- Explain the difference between absolute and relative references.
- How do you use conditional formatting?
- What are named ranges and how are they used?
- What is the difference between COUNT, COUNTA, and COUNTIF?
- How do you handle large datasets in Excel efficiently?
- Explain the usage of INDEX-MATCH vs VLOOKUP.
- What is a dynamic chart and how do you create one?
- How do you use IFERROR and ISERROR?
- What is the use of the OFFSET function?

Statistics / A/B Testing Interview Questions

Data Analyst Placement Preparation Guide

- What is the Central Limit Theorem?
- Explain Type I and Type II errors.
- What is confidence interval and how do you interpret it?
- Explain p-value and its significance in hypothesis testing.
- What is the difference between Z-test and T-test?
- How do you select the right sample size for A/B testing?
- What is statistical power?
- What are assumptions of linear regression?
- Explain the difference between correlation and causation.
- How do you perform chi-square test?
- What is the Central Limit Theorem?
- Explain Type I and Type II errors.
- What is confidence interval and how do you interpret it?
- Explain p-value and its significance in hypothesis testing.
- What is the difference between Z-test and T-test?
- How do you select the right sample size for A/B testing?

Data Analyst Placement Preparation Guide

- What is statistical power?
- What are assumptions of linear regression?
- Explain the difference between correlation and causation.
- How do you perform chi-square test?

Scenario-Based / Miscellaneous Interview Questions

- How would you explain a technical result to a non-technical stakeholder?
- What metrics would you use to measure campaign success?
- How would you detect outliers in a dataset?
- What steps would you follow for a data cleaning project?
- How do you handle missing values in a dataset?
- You found a discrepancy in data-what do you do?
- How do you prioritize tasks in a data analytics project?
- What is the lifecycle of a data science project?
- How would you compare performance between two websites?
- How do you validate the effectiveness of a dashboard?
- How would you explain a technical result to a non-technical stakeholder?

Data Analyst Placement Preparation Guide

- What metrics would you use to measure campaign success?
- How would you detect outliers in a dataset?
- What steps would you follow for a data cleaning project?
- How do you handle missing values in a dataset?
- You found a discrepancy in data-what do you do?
- How do you prioritize tasks in a data analytics project?
- What is the lifecycle of a data science project?
- How would you compare performance between two websites?
- How do you validate the effectiveness of a dashboard?
