

Extended Interview Q&A - Challa Jaipal Reddy

Technical Interview Questions and Answers

Technical Interview Questions

1. Describe your Real-Time Road Lane Detection Project.

Answer:

This project involved detecting and highlighting road lane boundaries from video feed using OpenCV in Python. We used Canny edge detection, region masking, and Hough Transform. Curve fitting allowed detection even on curved roads. It supports ADAS systems under various conditions like shadows or turns.

2. Describe your Walmart Sales Data Analysis Project.

Answer:

This was an end-to-end analytics project using PostgreSQL and Python. I performed data extraction, cleaning, and transformation. I ran SQL queries for sales aggregation and used Python for visualization and insight generation. Data was hosted and documented on GitHub.

3. What were the main challenges in your projects?

Answer:

In lane detection, challenges were varying lighting conditions, shadows, and curves. In Walmart analysis, handling large datasets with missing values and optimizing SQL queries were key issues.

4. How do you clean and transform large datasets?

Answer:

I use SQL to remove NULLs, duplicates, and normalize schemas. In Python, I use Pandas for filtering, merging, and reshaping data.

5. How did you document your Walmart project?

Answer:

All SQL scripts, visualizations, and insights were posted on GitHub with detailed README files for transparency and collaboration.

Extended Interview Q&A - Challa Jaipal Reddy

6. How did you handle real-time data processing in your lane detection system?

Answer:

The system used frame-by-frame video feed processing using OpenCV, with real-time filters and lane overlays drawn on each frame.

7. How do you version control your work?

Answer:

I use GitHub for version control. I create commits for updates, deletions, and documentation changes to keep track of progress.

Non-Technical Interview Questions and Answers

Non-Technical Interview Questions

1. Tell me about your native place.

Answer:

I'm from Sattenapalli in Andhra Pradesh, a town known for its peaceful lifestyle and strong educational culture. Growing up there shaped my discipline and values.

2. How would you describe yourself in 4 words?

Answer:

Curious, Analytical, Reliable, Adaptable

3. How would you rate yourself on a scale of 1 to 10?

Answer:

I'd rate myself an 8. I'm confident in my skills and learning mindset, but I always strive to improve further.

4. Tell me about a recent time you felt proud of yourself.

Answer:

I felt proud after completing my Walmart project and publishing it on GitHub. Seeing how my analysis could generate

Extended Interview Q&A - Challa Jaipal Reddy

real business insights was rewarding.

5. What do you do in your free time?

Answer:

I explore data projects, watch tech-related content, and follow LinkedIn analytics communities. I also enjoy playing chess and volunteering.

6. Why did you choose Data Analytics?

Answer:

I enjoy uncovering insights hidden in data and transforming raw numbers into actionable information. The impact of data on decision-making fascinates me.

7. How do you handle stress or pressure?

Answer:

I break tasks into smaller goals and focus on one step at a time. I also use time-blocking and mindfulness techniques.
